TAMALE RMS 3.0

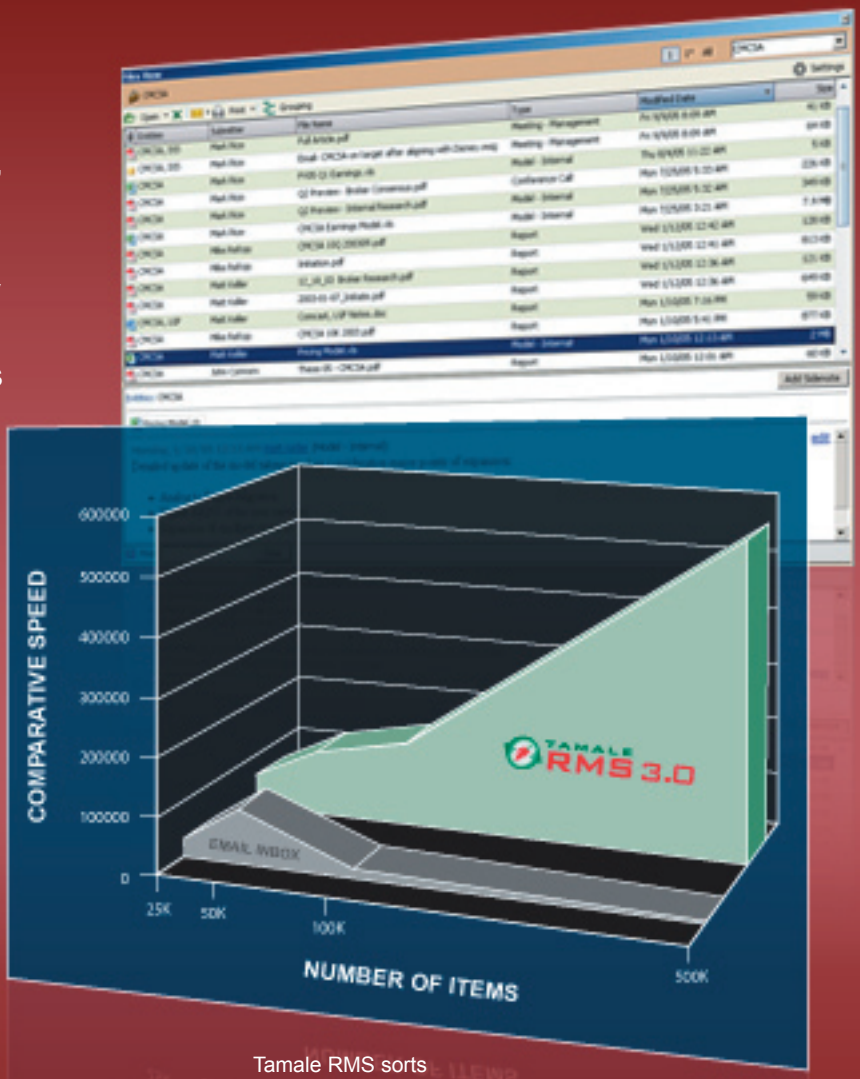
TAMALE SOFTWARE

ORGANIZATION ISN'T OPTIONAL

Unless information is organized, processed, and available to the right people — in a format for decision-making — it's a burden, not a benefit. Enter Tamale. As an industry leader in Research Management Software, Tamale RMS — now in Version 3.0 — helps investment professionals worldwide better leverage their research.

ANALYSTS, PORTFOLIO MANAGERS AND OTHERS DEMANDED IT

Hedge funds, asset-management firms, funds of funds, foundations, endowments, and private-equity firms alike have investment strategies that are more research-driven than ever. For all of them, Tamale RMS standardizes the research process, streamlines workflow, and improves idea-generation — all with single-platform centralization and total customization and configurability.



Tamale RMS sorts and filters your files by any parameter: ticker, source, submitter, subject, etc., and searches through your notes and messages quickly and accurately. Unlike traditional tools like email inboxes, the performance holds as you add more content.

ONE MILLION ITEMS, SUB-SECOND PERFORMANCE: INTRODUCING VERSION 3.0

The latest release, Tamale RMS 3.0, is all about performance and speed. A new data structure dramatically enhances scalability, making the software suitable for an ever-wider client base of investment professionals. And streamlined data handling makes the application faster than ever — for clients large and small.

Most important, with Tamale RMS Version 3.0, functionality stays fast — even as clients' needs expand. Tamale RMS 3.0 means quicker navigation, more nimble shifting of focus, speedier sorting and grouping, and more efficient searching overall — all with a smaller memory footprint.
